

Bartramia solitaria Mayr. Ann. Sci. C. 1911
*Myzobatismus fuscus Blythomorphus fuscus in our
form is probably the species of Blyth's which he
described as *M. fuscus* or *Blythia fuscus*.*

Good as my like) ~~earlier~~ or them they find them
amongst the fragments however at Colchester itself. In the presence of 225
Sufficiently recognizable in the fragments - ~~Collected~~ ~~Collected~~
representatives of all the species found in the Pleistocene or
recent or Tertiary. ~~Collected~~ ~~Collected~~ ~~Collected~~
