NOTES

Field Courses: Bursaries

Two members have, this summer, attended one of Dr. Alexander’s field courses for Excavation Directors and Site Supervisors, assisted by bursaries from the Society. Nominations for bursaries had been invited from institutional members of the Society and three of the five persons nominated were individual members. One of the unsuccessful nominees was able to attend one of the courses with the aid of a grant from another source.

Nominations for next year’s course should be sent to the Hon. Secretary. They should be accompanied by a letter of recommendation from an established excavation director or from an officer of an institutional member society or a society in union. At a later date the Council will decide on the number of bursaries to be granted next year.

(D. J. Turner).

Surrey Record Office—Saturday Opening

For the benefit of searchers unable to visit the Surrey Record Office at County Hall, Kingston upon Thames, during the week, for an experimental period of six months starting on 25th September, 1971, the Search Room will generally be open on second and fourth Saturdays of the month (except 13th November) 9 a.m. to 12.30 p.m. This is a restricted service. It is essential, therefore, that names and addresses of searchers and references to documents required be received by letter or telephone (01-546 1050, ext. 179) by noon on the Thursday before the proposed visit.

Rescue—Issue of an Interim Newsletter

Everyone who has subscribed to Rescue will by now have received their first Interim Newsletter. The following excerpts may encourage others to do so:

“Our first fund raising campaign has been directed at the committed and interested archaeological public through the societies, groups and journals, but the second phase, with a more appropriate leaflet, will be aimed at the uncommitted public. Meanwhile, we are seeking publicity of all kinds, in newspapers, on radio and television and by a series of
Rescue meetings up and down the country. A group of "horror slides" of destruction in town and country is being collected for multiplication into a number of sets of slides which can form, with their captions, the basis of lectures to be given by Rescue supporters to groups and meetings of all types.

"The part which Rescue can play in British field archaeology will depend entirely on how much moral and financial support it gets. A deputation has been invited to put to the Minister various proposals for the solution of the crisis, and to suggest ways in which the public and private sectors can co-operate to the fullest extent in providing money, manpower and expertise to rescue the evidence of Britain's past before it is obliterated.

"Rescue intends to work closely with the Inspectorate of Ancient Monuments, as well as supporting rescue work of all kinds in the field, in the laboratory and in publication. At the same time, it must mount a vast educational programme, since we have already found that much of the destruction now going on is due rather to ignorance than to vandalism. In addition, the large membership which we hope to achieve will provide a strong body of informed public opinion which will be able to press for better and more stringent legislation to protect what is left of our sites and settlement areas. . . ."

Woking: Cripplegate Cottage (SU 992581)

The owners of Cripplegate Cottage, Dr. and Mrs. D. A. Martin, reported that traces of wall paintings had been found during re-decoration. As a result of this report the house was visited by the President of the Society, Mr. J. L. Nevinson, who found dull red oil-bound paint on plaster underneath later layers of wallpaper and paint on a dado. Above this dado, showing through plaster, were traces of oblong panels, with double frames (wreath or ribbon) all round, quarter circle sectors at each corner, and in one case a full circle double-line medallion in centre. Although these frames probably contained pictures, these were not visible through the plaster and it was not considered that the expense of stripping was warranted. It was suggested, however, that, as the house itself was interesting, it should be visited by the Mayford History Society, and a note on it written for this Bulletin.

Cripplegate Cottage is a two-storey timber-framed building facing North, and comprises two bays on the West, a narrow bay containing the chimney stack in the middle, and a cross wing at the East end. Externally the two bays on the West have the timber-framing exposed, but the cross wing has no structural timber visible. The West gable end is half-hipped with gablet.

In the interior there is a considerable amount of timber visible in the walls of both parts of the house, and on the ground floor the beams and joists supporting the upper floor are unceiled. The ground floor room at the West end is very low pitched, and this was presumably the service end of the original house. A beam a few feet from the West wall of the next bay shows that there was a cross passage, which still has a doorway at its South end. The joists across the larger part of the room are mortised into this beam, but rest on the top of the beam in the East wall. Although this would seem to indicate an open hall, chambered over when the chimney was added, and the gablet would support this theory, no trace of soot could be seen on the roof partitions to confirm it.
From the evidence available, of which a brief summary has been given above, it appears possible that the original house consisted only of the two West bays of the present building, and that it may have had an open hall, in which case it is unlikely to have been built later than the middle of the 16th Century. If this supposition is correct, the chimney bay, and the cross wing, would have been added later, perhaps in the next century. Full notes, made by the writer, have been deposited at Castle Arch.

Limpfield: Medieval Coin from Lankeys Mead (TQ 402527)
A silver half groat of Edward III from the London mint (Pre-Treat. Series C (1351-2), cf., J. J. North, English Hammered Coins Vol. II, no. 1148) has been found at Lankeys Mead, Limpfield, by Mrs. Doreen Jarrett in whose possession it remains. The coin was identified by Mr. Stewart Lyon, M.A.

(Mrs. K. Percy).

Lambeth: Stockwell Park Road (TQ 309762)
Following a report by the owners of the discovery of a brick structure and pottery fragments in the back garden of 84 Stockwell Park Road, the Southwark & Lambeth Archaeological Society undertook a one day rescue excavation on the site.
A horizontal circular brick drain 10in. in diameter was uncovered and a layer of stoneware kiln waste material was found stratified above the drain. Three types of kiln furniture were found, rods, bars and props or pads, together with fragments of kiln bricks. The pottery consisted of small storage bottles, jugs, large wine or spirit containers, and spirit or wine flasks. The latter were impressed with the names addresses of wine or spirit merchants. On the evidence of the marked pieces the group can be dated to c.1837-46, which would appear on documentary evidence immediately to predate or be contemporary with the construction of the house and therefore also the drain. No known stoneware existed in the area and thus this, and the absence of other types of stoneware kiln furniture, such as saggers, would suggest that the material was probably sold as hard core, presumably from one of the Lambeth stoneware potteries.

Wimbledon and Putney Commons Centenary Celebrations
A 100 years ago a seven years battle to save Wimbledon Common from enclosure and building ended with victory for the small group of local residents who had fought the proposals of the Lord of the Manor. Though the fight was hard, it was conducted with the greatest courtesy on both sides and it is fitting that the present Earl Spencer attended the Celebrations which took place on 14th August. The Wimbledon and Putney Commons Act of 1871 vested some 1,100 acres, including Putney Lower Common, in a body of Conservators charged with keeping them, quoting from the Act, “as an open space, unenclosed and unbuilt on, with their natural aspect and state preserved as far as possible, for the purposes of exercise and recreation.” These aims have in general been attained, though not without a continuing struggle.
A popular misconception is that the land belongs to the people, but it is not common in that sense and it was not appropriate to register under the recent Commons Act, because in the technical sense it had not been a Common since 1871. The Act gives considerable powers to the Conservators and they make bylaws which are enforced for the benefit of users against those who would spoil it. Police powers were specifically extended over it.

Regency Surrey

Further researches into the works of John Hassell (1767–1825) have revealed that his value as a topographical writer may be equal to that as a comprehensive topographical artist. Mansions, mills, inns, coaches, land-use and local worthies are all subjects of his industrious pen—not to mention hunting, shooting and, above all, fishing. Anyone engaged in research into a Surrey topic during the first quarter of the 19th century would be well advised to consult Hassell. Enquirers after illustrations or references to specific places might find the writer’s indexes (at 7A Burntwood Lane, Caterham) helpful.
