- Wrecclesham: 35

# Surrey Archaeological Society

If you would like to take your interest further, why not join the Surrey Archaeological Society?

One of the oldest county societies in the country and with a distinguished record, the Society was established in 1854 with two main aims, those of research and publication – both still relevant today.

Research is actively encouraged through a range of specialist groups including Prehistoric and Roman Studies, Local History and Industrial Archaeology. Fieldwork and excavations are undertaken across the county and symposia, lectures, workshops and conferences are organized for the benefit of members and the wider community.

Publication is an essential element of the Society's work. The main journals of record, *Surrey Archaeological Collections* and *Surrey History*, appear regularly, and the *Bulletin* is issued nine times a year. The Society also sponsors a number of other occasional publications relating to the archaeology and history of the historic county.

Over the years, unique collections of artefacts and research material have been amassed. These are housed with our library at Castle Arch, Guildford, where both the archive and the library may be visited by prior appointment.

The nature and practice of archaeology over the years has necessarily changed, but growing numbers of members studying archaeology and history ensure that we are well placed to develop and continue our core activities. Today, however, the Society also needs the help of all those concerned to promote the sympathetic management of the county's historical and archaeological heritage. We would welcome your interest and support.

Membership is open to individuals or groups interested in the work of the Society. Visit our web page at [www.surreyarchaeology.org.uk](http://www.surreyarchaeology.org.uk)
